

Objectives: What do you want to achieve by implementing the project?

As the main objective of the project "Empowered in Inclusion" we see more inclusive schools, bringing more understanding, consciousness and better competencies into the day to day school-life and into providing qualitative education for each student in respect with their individual needs and capabilities. The project will contribute to the wellbeing and motivation in the teaching and learning settings both for teachers and students in the participating organisations.

Implementation: What activities are you going to implement?

Two project partners face to face meetings: partnership kick-off will be held online, and meeting will be in Estonia.

Three 5-day long study visits to the partner schools: Kärkla Basic School (Estonia), Vecpiebalga Secondary school (Latvia) and IES Ruiz de Alda (Spain).

One 6-day long seminar in Kepez Guidance and Research Center (Turkey).

8-10 regular local level knowledge circle gatherings in every partner country during the project process.

Results: What results do you expect your project to have?

- Inclusive and motivative teaching and learning environment. Everyone in a school is a valued and supported member of the entity whose well-being matters.
- Diverse and inclusive studies where both teachers and students experience satisfaction and joy.
- Improved competencies among the educational personnel to notice, cooperatively and effectively solve challenging situations.
- Students with diverse, including SEN, profiles are noticed, included, and supported according to their needs.
